

CONTINUOUS QUALITY
IMPROVEMENT (CQI) TOOLS:
CQI TEAM

The CQI Team

The CQI Team in the dialysis center usually meets on a monthly basis and reviews issues related to patient clinical outcomes, various processes, grievance activity, and a multitude of other possible issues.

The team consists of the multidisciplinary team—including the Medical Director. More and more dialysis centers are now inviting their vascular access surgeons and if possible, the interventional radiologists to their meetings to discuss vascular access issues.

Each individual on the team brings different perspective, talent, background, and ideas. On this team, the members are to be thought of as **equals**—each one has important input and value.
